College Code : 252

Report on Health Facilities Available in the College

Academic Year: 2025–2026

Health and safety are essential components of a positive learning environment. During the academic year 2025–2026, the college has ensured the availability of basic health care and first-aid facilities for students, teaching staff, and non-teaching staff to handle minor health issues and emergencies within the campus.

The college is equipped with essential first-aid materials including sterile cotton, gauze pieces, adhesive bandages, roller bandages, crepe bandages, and adhesive tape. To maintain hygiene and prevent infections, antiseptic cream (Betadine/Burnel), antiseptic solution (Dettol/Savlon), spirit, and sanitizer are provided.

Safety-related items such as disposable gloves, scissors, tweezers, and safety pins are available for proper handling of injuries. For immediate medical support, the college provides ORS packets, paracetamol tablets, pain relief balm, pain relief roll-on, and a hot water bag.

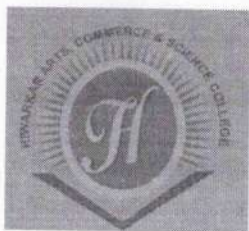

Additionally, the college has installed a napkin destroyer machine to promote menstrual hygiene and ensure a clean and healthy environment for female students.

These facilities help in providing prompt first aid during minor accidents, burns, fever, dehydration, or body pain. They contribute to maintaining a safe campus and creating health awareness among students.

During the academic year 2025–2026, the health facilities available in the college were found to be adequate and useful. They play a vital role in safeguarding the health of all stakeholders. Regular inspection and timely updating of medical supplies will further improve the effectiveness of these facilities.
